

PerformancePlus™ Wire Restraint Electrode

Expanding Vermed's popular line of stress and holter testing electrodes with an innovative wire restraint electrode available in wet or solid gel.

Shown actual size

A10071

A10072

- **Wire Restraint Electrode**
Safely secures lead wires preventing artifact associated with movement.
- **Specially Designed Electrode Shape**
Ease of correct placement with curved top to allow perspiration to move away from the top of electrode and wire restraint at the bottom.
- **Rectangular Shape**
2-1/4" x 1-1/2" size is perfect for nesting leads V1 and V2.
- **Foam Substrate**
Soft pliable foam ensures patient comfort.
Hydrophobic foam resists moisture on diaphoretic patients.
- **Aggressive Adhesion**
Strong adhesive reduces risk of electrodes sliding off during testing.
No additional tape necessary, reducing prep time and costs.
Hypoallergenic and latex free.
- **10% Chloride-Wet Gel**
Provides fast, crisp ECG tracings.
- **Coarse Gel Sponge-Wet Gel**
Acts as a prep pad to break down skin impedance.
- **Solid Gel**
Easy clean up. Proprietary solid gel formula supplies a strong signal due to very high moisture content.
- **Stainless Steel Snap**
Minimizes the amount of noise artifact due to lower incidence of corrosion compared to nickel plated brass used by most competitors.
- **Bulk Packaging**
Convenient for all applications with no waste.

Part Number	Description	Number of Electrodes		
		Per Strip	Per Pouch	Per Case
Solid Gel				
A10071-1-60	2 1/4" x 1 1/2" Foam Metal Snap	1	60	600
Wet Gel				
A10072-1-60	2 1/4" x 1 1/2" Foam Metal Snap	1	60	600
